

Green Facts & Stats

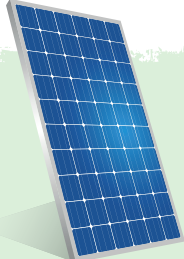

Concord College

This exciting project to construct a state-of-the-art sports hall and a modern, welcoming boarding house will not only serve the needs of future students and staff but also contribute positively to the environment and the wider community.

The planting schemes are estimated to absorb 2,000 kilograms of CO2 emissions annually. By repurposing excavated materials, we've avoided the need for 425 haulage lorries to collect and transport waste, significantly reducing our overall carbon footprint.

10
different varieties of trees

48
solar panels on the Sports Hall roof

5,091 tonnes
excavated material retained on site to create a bund of natural habitat and green space

13,667ft²
of seeding and turfing

1,000ft
of hedges planted with 20 varieties
